JEE Main 2026

Chapter-Wise Weightage + 60-Day Revision Planner

A free study guide for JEE aspirants

How to use this: First look at the weightage tables and mark the high-weight chapters you are weak in — those are your fastest marks. Then follow the 60-day planner and tick each day off. Print it or keep it open while you study.

Note: weightage figures are approximate, based on recent years' JEE Main papers — not an official NTA breakup. Use them as a priority guide.

Chapter-Wise Weightage (Physics, Chemistry, Maths)

Physics

Chapter / Area	Approx share of marks	Priority
Electrodynamics (Current, Electrostatics, Magnetism, EMI)	20%	High
Mechanics (Kinematics, Laws, Rotation, Gravitation)	18%	High
Modern Physics & Electronics	13%	High
Heat & Thermodynamics	10%	Medium
Optics (Ray + Wave)	9%	Medium
SHM & Waves	8%	Medium
Others	22%	—

Chemistry

Chapter / Area	Approx share of marks	Priority
Physical Chemistry (Mole, Thermo, Equilibrium, Electrochem)	34%	High
Organic Chemistry (GOC, Hydrocarbons, Oxygen-containing)	34%	High
Coordination & p-block	14%	High
Periodic Table & Chemical Bonding	10%	Medium
Others	8%	—

Mathematics

Chapter / Area	Approx share of marks	Priority
Calculus (Limits, Continuity, Differentiation, Integration)	28%	High
Coordinate Geometry	17%	High
Algebra (Matrices, Complex, Sequences, Binomial)	16%	High
Vectors & 3D Geometry	12%	Medium
Probability & Statistics	9%	Medium

Trigonometry	8%	Medium
Others	10%	—

Your 60-Day Revision Plan

Days 1-15	Weak + high-weight topics	Diagnose your weak areas, then drill them with problems (not just theory).
Days 16-30	Remaining high-weight chapters	Cover the rest of the heavy chapters; daily mixed practice.
Days 31-45	Full mocks + deep analysis	A full mock every 2-3 days; spend ~2 hrs analysing each one.
Days 46-55	Targeted revision	Revise your logged mistakes, formula sheets and Inorganic Chemistry.
Days 56-60	Taper & peak	Light revision, 1-2 easy mocks, full sleep — no new topics.

Daily tracker — tick each day as you finish it:
